PROFESSIONAL SUMMARY

As a Full Stack Engineer, my expertise lies in developing and maintaining web applications, from front-end to back-end components. I possess a strong command of various programming languages, frameworks, and tools required for web development, including **JavaScript (typescript)**, **React**, **Node.js**, **Nextjs** and others. With a deep understanding of both client-side and server-side technologies, I am skilled in creating responsive and dynamic user interfaces, designing robust APIs, and integrating databases. Additionally, I am a proactive problem-solver who enjoys collaborating with teams to create innovative solutions that meet business requirements. Overall, I am committed to staying up-to-date with the latest trends and technologies in full-stack development to ensure that I provide high-quality solutions that align with industry best practices and standards.

WORK EXPERIENCE

Full Stack Engineer

Freelance, Remote

May 2020 - current time

- Leverage the React toolkit for creating frontend features.
- Develop responsive web-based UI.
- Optimize components to work seamlessly across different browsers and devices.
- Translate wireframes and designs into good quality code.
- Enhance application performance with constant monitoring.
- Work statemanagement libraries such as redux.
- developing.
- build and maintain the server-side components of web applications with different server-side languages and frameworks such as nodejs, express and nextjs. This involves designing and implementing APIs.
- integrate seamlessly with the front-end components. This involves collaborating on the design of APIs, testing and debugging code, and providing support as needed.

Frontend, odoojs (owl)

Noptechs - full time

Jan 2021 - April 2022

- In this time period I've worked with new js framework called odoo web library to develop odoo modules and ui components. customizing odoo web interfaces to meet clients' needs. It's mostly inspired by react, it's been quite a challenge for me to try different javascript frameworks.
- mainly I've been working with point of sale (POS) modules in odoo, and I've intergrated many of new features and components.
- testing and ensuring these modules meet the requirements.

TECHNICAL SKILLS

Programming languages

javascript(with typescript), nodejs, python, java.

Databases

postgresql, mysql, mongoDB

Other Skills

- data structue and algorithms.
- versioning control tools (git, github, gitlab).
- api design (RESTful and graphQL).
- Agile methodology.
- Scrum.
- developing and running Docker-based systems.
- fast learner.
- know well how to google things.

ABDALLAH ABDELMONIEM

FULL STACK ENGINEER

SOCIAL SKILLS

- Communication
 - Collaboration
 - Leadership
 - Adaptability
 - Problem-solving
 - Empathy
 - Conflict resolution
-

LANGUAGES

Arabic native language

English C1 - Advanced - Professional

WORK EXPERIENCE

Odoo Developer

App-script - full time

Jan 2019 - Dec 2020

- Collect Needs and draft ERP application requirements
- Design, Development and testing of Odoo (OpenERP) modules, projects, products and interfaces.
- Maintaining existing modules.
- Complete and clear documentation for any task/work done.
- Test new functions / modifications to existing application modules in accordance with application support.
- Configuration, installation and maintenance of server and multi database Odoo/Ubuntu environments.
- Keeping different projects/versions under control using SVN or Git.
- Other development tasks in systems developed in Python other than Odoo.

EDUCATION

Bachelor of Science degree in Software Engineering

Sudan University of Computer Science & Technologies

2013 - 2018
